Regulator **AR Series**

Refer to the Best Pneumatics No. 6 for further details.

Mist separator **AM Series**

AM series separates and removes the oil mist and removes fine particles of rust and carbon, etc., of 0.3 μm or larger.

Refer to the Best Pneumatics No. 6 for further details.

Micro mist separator **AMD Series**

AMD series can separate and remove aerosol state oil mist and remove carbon or dust of more than 0.01 μm.

Refer to the Best Pneumatics No. 6 for further details.

Filter regulator + Mist separator Air combination **AC20D/30D/40D Series**

Refer to the Best Pneumatics No. 6 for further details.

Water separator **AMG Series**

The AMG series remove droplets of water from compressed air. Use it when it is necessary to remove water, but when air as dry as that from an air dryer is not necessary.

Refer to the Best Pneumatics No. 6 for further details.

Membrane dryer **IDG Series**

Macromolecular membrane dryers that act like filters -2°C low dew point just by installing on air pressure line. No power supply required.

Refer to the Best Pneumatics No. 6 for further details.

<For strainer>
**Industrial filter
Vessel type
FGD Series**

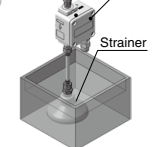

Strainer **P257014A**

Strainer for the collection of fluids

Application example

Process pump

Specifications

Part no.	P257014A
Fluid	Cutting oil
Applicable tube O.D./I.D	ø6/ø4.5
Nominal filtration rating	60 mesh wire
Material	Cast iron/Electroless Ni-P alloy plating
Weight kg	0.2

Refer to the Best Pneumatics No. 6 (HEP500-04) for further details.
